Sky Blue Signature: Team Style Guide

Team Sky Blue | Group 4 | COMP229 | Written by Julia Cameron, Technical Artist

What this is

Our team voted for the **Sky Blue Signature** look for the Subway Alerts app. This guide shows the exact colors, fonts and button styles to use, so every page looks like it belongs to the same app. If you build or design a page, please follow this guide and do not choose your own colors.

Mobile first

Our app is used mainly on phones. Design every page for a phone screen first (about 360 to 430 px wide), then make it work on bigger screens.

- **One column.** Keep 16 px between the screen edge and the content.
- **Easy to tap.** Every button, field and link is at least 48 px tall, with at least 8 px between things you can tap.
- **Main action at the bottom,** where the thumb is. Use a bar fixed to the bottom of the screen with the primary button, for example Report a delay.
- **Readable text.** Body text is at least 16 px. Form fields must also be 16 px or bigger, or iPhones zoom in when you tap them.
- **No hover on a phone.** Every button must change when it is pressed. Hover effects are only a bonus on computers.
- **Keep pages light.** Few images, so pages load fast on mobile data.
- **Add this line inside the head of every page:** `<meta name="viewport" content="width=device-width, initial-scale=1">`
- **Test it.** In Chrome press F12 and click the phone icon, and also try the page on a real phone.

1. Colors

Name	Code	Use it for
Background	#EEF6FF	The page background
Card	#FFFFFF	Cards, boxes and panels
Text (navy)	#0B2545	Main text and headings
Muted text	#5C7391	Small notes, times, hints
Main blue	#1E90FF	Main buttons, links, focus outlines
Second blue	#5B8CFF	The second color in the button gradient
Resolved green	#12B886	Resolved reports
Delay orange	#F76707	Active delays and warnings
Border	#D4E4F7	Thin lines around cards and fields

Name	Code	Use it for
Button text	#FFFFFF	Text on the blue and rose buttons
Delete rose	#C92A4B	Delete buttons only, always with a confirm step

Rule: an active delay is always **orange** and a resolved report is always **green**. Delete has its own rose color, only for deleting. Do not use any other red.

2. Fonts

Use	Font	Weights
Headings and numbers	Bricolage Grotesque	500, 700, 800
Body text, buttons and forms	Figtree	400, 600, 700

Both fonts are free on Google Fonts. If a font does not load, the page uses the computer's own font (system-ui). That is fine.

Text sizes on a phone: body text 16 px or bigger, small notes 13 to 14 px, page headings 28 to 32 px. On bigger screens, headings can grow up to 48 px.

3. Buttons

All buttons have very round corners (26 px), bold text (700), the padding 14 px top and bottom, 24 px left and right, and a height of at least 48 px so a thumb can tap them. On a phone, a main button can be full width.

Button	Look	When to use it
Primary	Blue gradient (#1E90FF to #5B8CFF), white text	The main action on a page, like Report a delay or Send report. Use only **one** primary button per page area.
Secondary	Blue outline (2 px), blue text, no fill	Other actions, like View live feed
Text button	Plain text. A blue line slides in under it when you point at it	Small actions, like Moderator login
Still happening	Light blue fill. After you press it, it turns into the blue gradient	The vote button on each report
Delete	Rose outline (2 px, #C92A4B) with rose text, no fill. After the user taps it, a question asks to confirm, with a solid rose button and white text	Only for deleting a report. Never use it for any other action

Hover and press: the primary button moves up 3 px, gets a soft blue glow and a light shine. When pressed, it gets a little smaller (97%). Phones have no hover, so this press effect is the one that counts. Hover is only a bonus on computers. Keep the movement short (0.2 to 0.35 seconds).

4. Cards, fields and status tags

- **Cards:** white, 1 px border (#D4E4F7), corners 24 px on phones (32 px on bigger screens), padding 20 px on phones (24 px on bigger screens).
- **Form fields:** background #EEF6FF, 1.5 px border (#D4E4F7), corners 26 px. When you click inside, the border turns blue (#1E90FF) and a soft blue ring appears around it. Fields are at least 48 px tall with 16 px text. Labels sit above the field in bold, 14 px. Use the right input type (email, password), so the phone shows the right keyboard.
- **Line marker:** a round circle (42 px) with the line number in Bricolage Grotesque, in the blue gradient. For a resolved report, the circle is light grey-blue (#D4E4F7) with muted text.
- **Status tags:** a small pill with bold 13 px text. **Active** is orange text on a light orange background. **Resolved** is green text on a light green background.
- **Live dot:** a small orange dot that pulses, next to anything that is live.

5. Spacing and movement

- Use spacing in steps of **8 px**: 8, 16, 24, 32, 48.
- Leave space around things. Do not crowd the page. On a phone, keep 16 px between the screen edge and the content.
- Keep all animation short and gentle. For people who turn off animation on their computer, the page should stay still.

6. Rules for everyone

1. Use only the colors in this guide.
2. Headings use Bricolage Grotesque and everything else uses Figtree.
3. One primary button per area. Use secondary buttons for everything else.
4. Dark text on light backgrounds. Do not put light grey text on white.
5. Every button and field must show a clear outline when you use the keyboard (Tab key).
6. Design for the phone first. Every tap target is at least 48 px tall.
7. The rose Delete button is only for deleting, and it always asks the user to confirm first.
8. If you want a new color or style, ask Julia first so the guide stays the same for everyone.

7. Copy-paste CSS

Save this as **styles.css** and add it to every page. Colors and fonts are saved as names (variables), so you write var(--p1) instead of the color code.

```
@import
url('https://fonts.googleapis.com/css2?family=Bricolage+Grotesque:wght@500;700;800&family=Figtree:wght@
400;600;700&display=swap');

:root {
  --bg: #EEF6FF;  --card: #FFFFFF;  --text: #0B2545;  --muted: #5C7391;
  --p1: #1E90FF;  --p2: #5B8CFF;    --ok: #12B886;    --bad: #F76707;
  --danger: #C92A4B;  --line: #D4E4F7;
  --radius: 26px;
  --glow: 0 12px 28px rgba(30,144,255,.40);
  --font-head: 'Bricolage Grotesque', system-ui, sans-serif;
  --font-body: 'Figtree', system-ui, sans-serif;
```

```
}

body { margin: 0; background: var(--bg); color: var(--text); font-family: var(--font-body);
       font-size: 16px; line-height: 1.55; }
h1, h2, h3 { font-family: var(--font-head); line-height: 1.1; }

.btn { font: 700 1rem var(--font-body); border-radius: var(--radius); min-height: 48px;
       padding: 14px 24px; cursor: pointer; border: 2px solid transparent;
       transition: transform .2s, box-shadow .25s; }
.btn:active { transform: scale(.97); }
.primary { color: #fff; background: linear-gradient(135deg, var(--p1), var(--p2)); }
.primary:hover { transform: translateY(-3px); box-shadow: var(--glow); }
.secondary { color: var(--p1); border-color: var(--p1); background: transparent; }
.secondary:hover { background: rgba(30,144,255,.14); }
.danger { color: #fff; background: var(--danger); }
.danger-outline { color: var(--danger); border-color: var(--danger); background: transparent; }
.danger-outline:hover { background: rgba(201,42,75,.12); }

.card { background: var(--card); border: 1px solid var(--line); border-radius: 24px; padding: 20px; }
@media (min-width: 600px) { .card { border-radius: 32px; padding: 24px; } }

input, select, textarea { width: 100%; font: inherit; color: var(--text); background: var(--bg);
       border: 1.5px solid var(--line); border-radius: var(--radius); min-height: 48px; padding: 12px
14px; }
input:focus, select:focus, textarea:focus { border-color: var(--p1); outline: none;
       box-shadow: 0 0 0 4px rgba(30,144,255,.22); }

.chip { font: 700 .8rem var(--font-body); padding: 5px 12px; border-radius: 999px;
        color: var(--bad); background: rgba(247,103,7,.16); }
.chip.ok { color: var(--ok); background: rgba(18,184,134,.16); }

/* Bar fixed to the bottom of a phone screen, for the main button */
.bar { position: sticky; bottom: 0; padding: 12px 16px calc(12px + env(safe-area-inset-bottom));
       background: rgba(255,255,255,.95); border-top: 1px solid var(--line); }
.bar .btn { width: 100%; }
```

Where to find it

The full working examples are the files **subway_alerts_ui_preview.html** (on the Sky Blue Signature tab) and **sky_blue_style_guide_page.html** (the Sky blue style guide page). Open them in a browser to see all of these styles in action.
