10. Conclusion

Helping commuters make more informed decisions together !

Sky Blue app

is a community driven platform for sharing and confirming subway delays.

Commuters can submit a report with the line, station, and a description of what happened, then confirm whether a delay is still occurring.

The report list shows both active delays and resolved reports, while moderators can resolve outdated reports or remove inappropriate and duplicate content.

THE CORE EXPERIENCE

01 **REPORT**
Share what you observe

02 **CONFIRM**
Check if it is still happening

03 **DECIDE**
Travel with better context

REPORT. CONFIRM. DECIDE. Travel smarter together!
